Part of the VEKA Outdoor Living Family

## Welcome to VEKA Outdoor Living Products

VEKA's name is known for its commitment to quality, safety and durability. It is also a reminder that we stand behind all of our products.

We are constantly researching the marketplace to bring you the finest products and materials at the best possible prices. VEKArail™ Pro Railing System is engineered to exacting standards to assure you enjoy your quality, low maintenance railing for years to come.

## VEKA OUTDOOR LIVING PRODUCTS IS PROUD TO INTRODUCE IT'S NEW GREEN INITIATIVE FOR EXTRUDED PVC PROFILES, DUALEDGE™, ECO LAYER EXTRUSION TECHNOLOGY.

For almost 50 years VEKA has been a premium supplier of PVC profiles for the window, door, fence, deck and railing industries. For years, European corporations have been at the forefront of the closed material life cycle for sustainable products and VEKA is no exception.

Environmental awareness has always been a focus of all the VEKA facilities worldwide with the catalyst being a PVC recycling plant in Germany, operated exclusively by VEKA.

For over 10 years, VEKA North America has focused on its own initiatives by using in-house mixed color, pre-consumer, reclaimed PVC for agricultural post & rail as well as extruded packaging containers and liners.

DualEdge™ Eco Layer profiles are VEKA's first introduction of this reclaimed\* material into the marketplace. Select shapes are being introduced to our fabricator base for the manufacture of PVC fence and rail. The dual layers consist of VEKA's standard, high performance, weatherable PVC outer shell, along with, our own in-house captured PVC substrate. By using our own material for the substrate, VEKA is assured that the highest quality, high performance ingredients are blended into the formulation guaranteeing that DualEdge™ will exceed industry standards. As a result of proven performance characteristics, DualEdge™ comes with a limited lifetime warranty\*.

For you, the fabricator, it is peace of mind that you are using a material that contributes to your own green initiatives through reclaimed PVC. This product uses less embodied energy to produce which means less fuel consumption. Also, products made with DualEdge™ profiles show a dedication to environmental responsibility within your community.

Gain the competitive edge in the marketplace by directly effecting your bottom line with DualEdge™ Eco Layer Extrusion Technology.

\* DualEdge substrate contains pre-consumer, reclaimed vinyl material from its customers waste stream.  
Please see complete warranty for terms and conditions.
